Mean light curve

Phase MIN = 0.67 ± 0.03

Mag MIN = 5.2

Phase MAX = 0.09 ± 0.04

Mag MAX = 5.1

M-m = 0.42 ± 0.07

Amplitude = 0.1

Mean MAX (JD) = 45234.04 ± 0.18

O-C (GCVS 85) = 0.40 ± 0.18 d

Note: phases of extremum points on mean light curve have been calculated by SOP program.

NdlR : As usual, these observations underestimate the real amplitude of the variations !
